

**Draft Agenda  
Working Group Meeting  
(WG 1: improvement of quality of data collection in occupational diseases)**

**COST Action IS1002  
Modernet  
Amsterdam, The Netherlands, 6-4-2011, 14.00-16.00**

- 1. Introduction (WG-leader)**
- 2. Specific actions of the WG (discussion)**

***Topics (according to the work plan):***

1. Cochrane review on work-related stress and mental ill health
2. Delphi study for defining work-related conditions
3. Development of a guideline for evidence based development of case definitions of occupational diseases
4. Development of a workshop for the implementation of evidence based case definitions. The workshops can be used in the participating countries.
5. Studies on workers' and doctors' conceptions of occupational diseases.
6. Assessment of the information needs of stakeholders for prevention of occupational diseases and the developments of tools to satisfy these needs
7. Evaluation of different sampling strategies to achieve optimal response

***Aspects to be discussed:***

- Experience with the topics above and already executed research
- Possibilities for additional funding
- Available capacities and expertise of the participating centres concerning the topics
- Expected publications on the topics
- Options for Short Term Scientific Missions (STSM's)
- Communication on the activities of the WG

- 3. Action plan for the WG (to be presented in the plenary feedback session)**
